# AT A GLANCE

## The Visual Guide to 369X

Everything about 369X — in pictures, in under 10 minutes.

POWERED BY PEOPLE • DRIVEN BY PREDICTIONS

THE BIG PICTURE

# 369X in 60 seconds

**WHAT**

A prediction market: trade YES / NO on real-world events.

**HOW**

Right answer = $1 per share. Wrong = $0. Price = probability.

**WHY DIFFERENT**

User-listed markets · leverage on outcomes · creator fees.

**TRUST**

Non-custodial smart contracts on BNB Chain. Your wallet, your funds.

**TOKEN**

$369X · 369M fixed supply · buyback & burn from real fees.

**STATUS**

Testnet launching now → token sale → mainnet & TGE.

01

PART 01

# Prediction markets, simply

The whole idea in three pictures.

THE BASIC IDEA

# A market where you trade what happens next

LIVE MARKET · CRYPTO

**Will Bitcoin be above $90,000 by Friday?**

YES 64% NO 36%

Buy YES · 64¢ | Buy NO · 36¢

→

**News arrives**

Traders react — the price moves like a live scoreboard.

**You were right**

Each share pays **$1** once the outcome is final.

**You were wrong**

Shares pay **$0**. You lose your stake.

THE ONE RULE TO REMEMBER

# Price = probability

**YES costs 58¢ → crowd says 58% likely**

IF YOU BUY YES AT 58¢ AND… (BEFORE FEES & PRICE IMPACT)

**+72%**
you're right → $1.00

**-100%**
you're wrong → $0.00

### Change your mind early

Sell at the live price until the 1-hour cut-off.

YES + NO always add up to **$1**. No confusing odds like 4/7 or -138.

WHY IT MATTERS

# More than a trade — a truth machine

### Sharper forecasts

Money on the line beats opinions — crowds often out-predict polls and pundits.

### Hedge real risk

Protect against a rate hike, a bad season or a price crash with one share.

### Instant news signal

Odds update the second news breaks. Media and analysts now watch them.

### Forecasting skill

Know sport, crypto or politics? Good forecasts under uncertainty rise to the top.

**CASINO / BOOKMAKER**

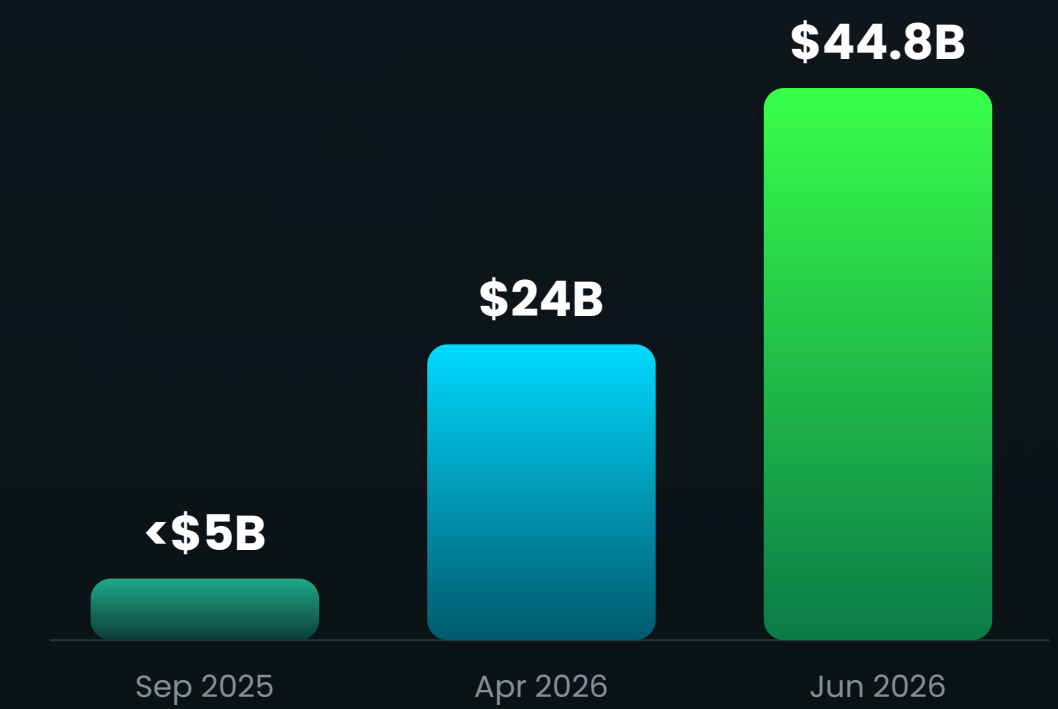
The house sets the odds and **wins when you lose.**

**PREDICTION MARKET**

The crowd sets the price and you win **when your forecast is right.**

THE OPPORTUNITY

# A market that grew ~9× in 9 months



**$63B+**
traded on prediction markets in 2025

**$20B+**
Kalshi's reported valuation · Polymarket ~$15B

**$3B+**
on one single market — the 2026 World Cup winner

Sources: Pew Research / The Block (May 2026) · June 2026 figure from The Block via MetaMask (published 4 Aug 2026) · Dune / Bitcoin.com (2026). Trading volume, not deposits.

THE GAP

# What today's platforms still get wrong

### Custody risk
Big platforms hold your money.

### Geo-blocks & KYC
39 countries restricted; KYC-heavy rivals.

### Closed listings
Users can only suggest; the company decides & keeps the fees.

### Thin liquidity
Niche markets have no one to trade with.

### Little value flows back
Market originators don't share in fees.

### No outcome leverage
Asset perps exist — a separate product, not YES/NO leverage.

The leaders proved the demand. **369X is built to fix these six gaps.**

02

PART 02

# Meet 369X

Predict. Participate. Prosper.

PLATFORM PROFILE

# The prediction market built around its users

A decentralised, non-custodial prediction-market platform on BNB Smart Chain — where anyone can trade, list markets and earn from the platform's growth.

MISSION

**Let the crowd price the truth — through open, fair, self-custodial markets that reward the people who make them work.**

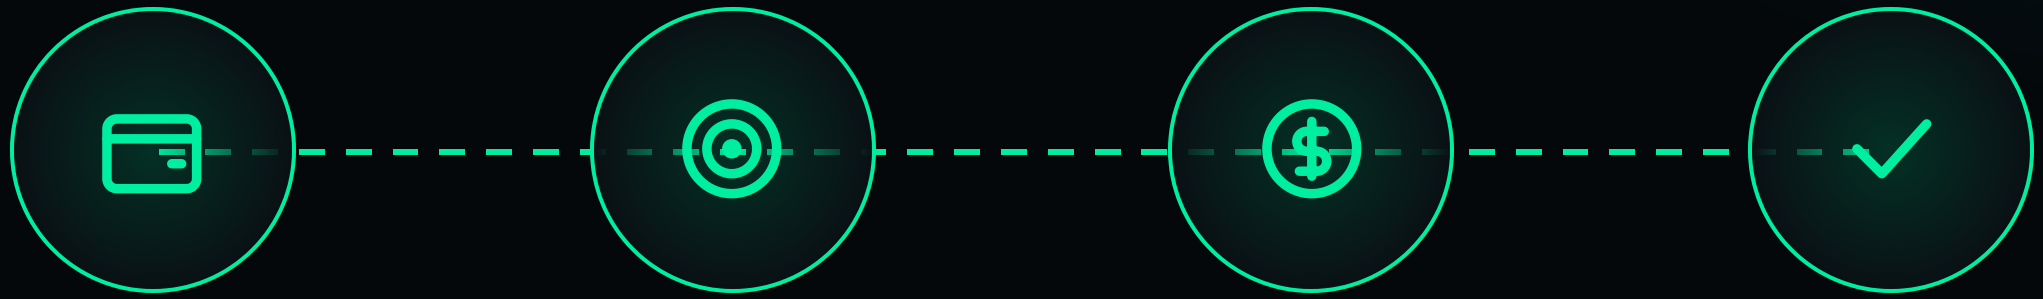
VISION

**A global "truth layer" where every trending event — from a local election to a World Cup final — has a live market.**

- BNB Smart Chain
- Non-custodial
- $1 minimum
- 2% base fee
- LMSR liquidity
- 2×–10× leverage
- $369X token
- Testnet launching now

HOW 369X WORKS

# Four steps. No middleman.



01

## Connect

Any Web3 wallet. No forms.

02

## Choose

Pick a market — or request a new one.

03

## Predict

Buy YES or NO from $1.

04

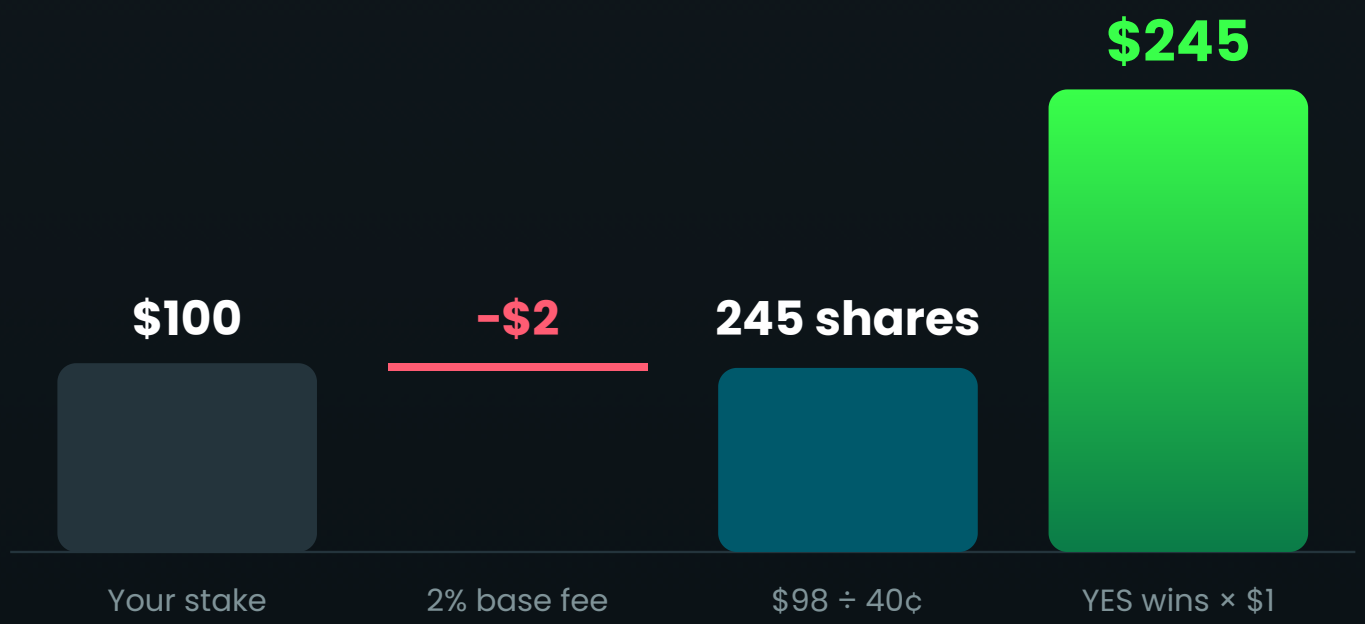
## Collect

After finalization, claim $1 per winning share.

Place a trade in under a minute. Payouts follow once the outcome is final — every step on-chain.

WORKED EXAMPLE

# $100 on YES at 40¢ → $245



NET GAIN

**+$145**

ROI 145%

IF WRONG

**−$100**

Max risk = your stake

IF UNRESOLVABLE

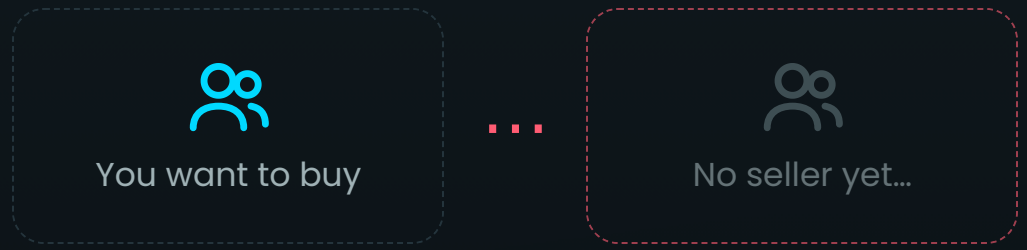
**Void refund**

what you paid for shares still held

THE ENGINE INSIDE

# LMSR: a market maker that is always quoting

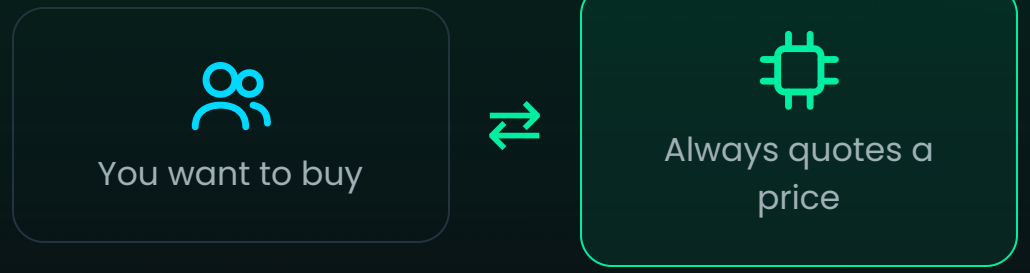
## ORDER BOOK (MOST PLATFORMS)



**Waits for a matching trader.**

Niche markets go empty — wide spreads, no fills.

## LMSR (369X)



**Automated quotes on any open market, any hour.**

Subject to funding, limits & price impact · market-making subsidy capped · depth grows with volume.

> Think of it like a vending machine vs a flea market: the vending machine always has a price on display.

MARKET LIFECYCLE

# From question to payout — enforced by code

1 **Open**
Trade YES/NO
`LIVE`

2 **Cut-off**
Trading freezes
`1 hr before end`

3 **Proposed**
Outcome + $100 bond
`after expiry`

4 **Dispute**
Anyone can challenge
`48 hours`

5 **Resolved**
Claim $1 per winning share
`after finalization`

**Honest proposer** gets bond back + reward

**Liar** loses the bond to the challenger

**Claims & refunds** designed never to pause

SIGNATURE FEATURE

# User Market Listing — you decide what's tradable

Elsewhere, users can at most suggest a market — and never share the revenue. On 369X, any user can request one and earn from it.

**Spot a trend**

Election, match, token launch, viral debate

→

**Submit request**

CREATOR EARNS

**0.5%**

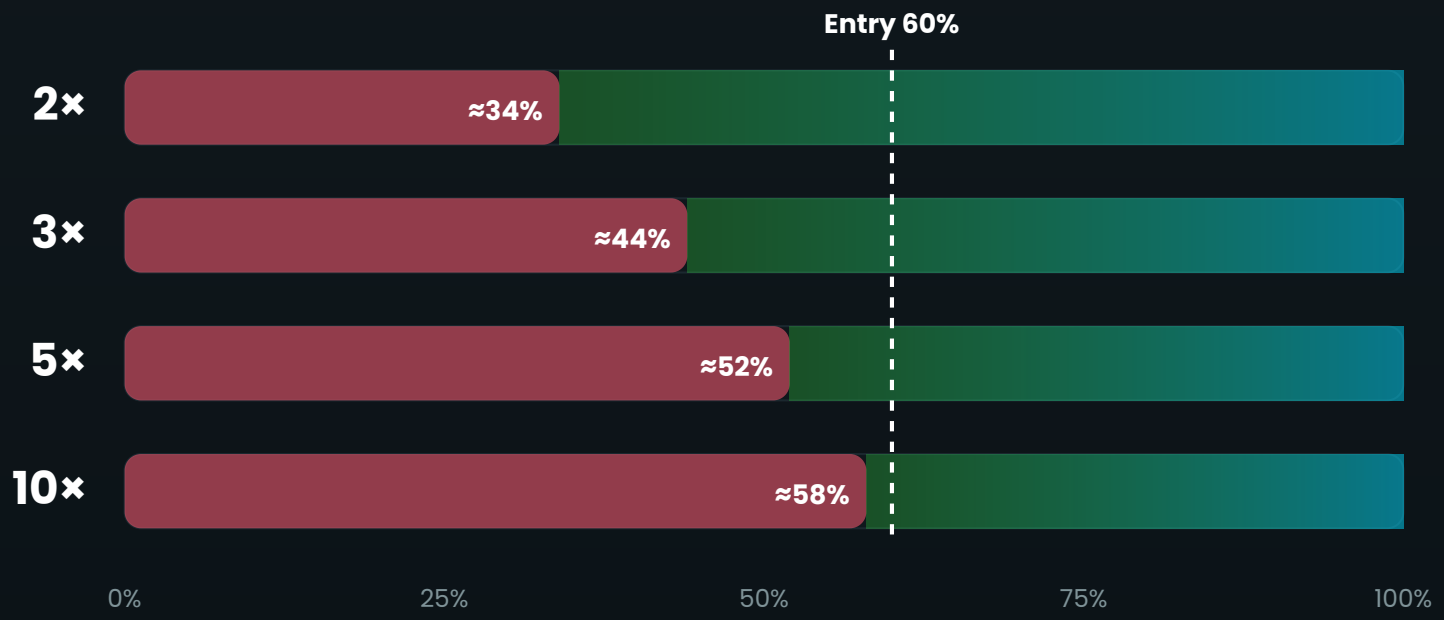
of eligible volume, for the market's active life

The scarce resource in prediction markets isn't money — it's good questions. **People closest to a trend spot it first. 369X pays them for it.**

LEVERAGE & FUTURES-STYLE TRADING

# Amplify your conviction — up to 10×

YES OPENED AT 60% · RED ZONE = LIQUIDATION (30-MIN AVERAGE ODDS)



Illustrative levels, pending testing & audit. Sudden price gaps or delayed execution can cause LP Vault losses. 5×/10× only on graduated markets.

EXAMPLE · 5× YES AT 60%

**$200 → $1,000**

your collateral + $800 from LP Vault

IF YES WINS

**+$633**

+317% on collateral, after the 2% fee

WORST CASE

**−$200**

designed max loss = your collateral

PART 04

# Economics & $369X

Where every fee goes — and how the token captures real value.

FEE ECONOMICS

# 2% base fee. Shared four ways.

ON EVERY $100 TRADE

**$98**

**0.25%**
**LP yield**
to LP Vault depositors

After TGE, **30% of the protocol fee buys back $369X** — half burned, half to stakers. Staker discounts apply only to the protocol share (effective 1.575%–2%).

THE FLYWHEEL

# Usage drives value. Value drives usage.

Every trade feeds creators, liquidity providers and the token at once — which attracts more markets, which attracts more traders.

> Rewards come from **fee-funded buybacks + capped reserves** — no new tokens are ever minted.

THE $369X TOKEN

# A token earned by the people who predict

**369M**
**Total supply**
hard cap · no mint

**BEP-20**
**Standard**

## WHAT $369X DOES

- Resolution staking
- Protocol-fee discounts
- Governance
- Liquidity mining
- Market creation bond
- Leverage perks

Indicative parameters, subject to final terms at the Token Generation Event (TGE). Not a promise of price or returns. Trading itself runs on USD stablecoins — the token is optional.

POSITIONING

# Where 369X wins — and where it's building

### 369X LEADS ON PRODUCT DESIGN

- ✓ Community-listed markets + creator economy
- ✓ Leverage on the outcome itself
- ✓ Automated LMSR quotes on every open market
- ✓ Fees shared with creators, LPs & token holders
- ✓ Self-custody on low-fee BNB Chain

### THE LEADERS LEAD ON SCALE

- Billions in monthly volume
- Established brands & user bases
- US regulatory licences (Kalshi, Polymarket US)
- Deep order-book liquidity on big events

> 369X is launching its testnet now. The edge is the design — volume, audits and adoption come next.

UNIQUE SELLING POINTS

**0–6 MO**

## Token & mainnet

PLANNED

ICO Phase 1 (incl. Founders) → Phases 2–3 · audit · mainnet · TGE & listing · staking · User Market Listing

**6–12 MO**

## Scale

PLANNED

Multi-outcome markets · outcome perps · more chains · API · iOS/Android · fiat on-ramps

**YEAR 2**

## Smarter markets

PROPOSED

Parlays · live in-play sports · AI market assistant · copy-trading · DAO handover

**YEAR 3**

## Infrastructure

PROPOSED

White-label B2B · prediction indices · options on outcomes · reputation SBTs

**YEAR 5**

## Truth layer

VISION

Every trending event gets a market in minutes · AI agents · multi-chain network

> Growth focus: global, mobile-first audiences across Latin America, Africa, the Middle East, Asia & Europe · sports-first demand (football, basketball, cricket, F1, esports) · creators & B2B embeds.

Year 2–5 items are strategic proposals, not committed delivery dates.

BEFORE YOU START

# Know the risks

**Total loss**
Losing shares pay $0.

**Leverage**
Positions can be liquidated.

**LP Vault**
Vault loses when traders win.

**Smart contracts**
Bugs possible even after audits.

**Token price**
Indicative; may trade below sale price.

**Regulation**
Check the law where you live.

For information and education only — not investment, legal, tax or financial advice, and not an offer to sell any token. $369X figures are indicative. Payouts are in a USD stablecoin whose peg 369X does not guarantee. Trade only what you can afford to lose.
